ACCESSIBILITY CONFORMANCE REPORT

VPAT® Version 2.4– August 2024

1.1 EVALUATION METHODS USED

This conformance report is based on the results of an accessibility audit conducted on a sample of 20 key pages. These pages were selected and agreed on by MapleLMS as representative of the overall accessibility and functionality of the MapleLMS learning management system (LMS).

The evaluation was completed following the **WCAG Evaluation Methodology (WCAG-EM).**

The pages were audited manually and cross-checked using a team of website evaluators to ensure that the results and comments presented are valid and comprehensive. Separate and external testing of these pages has been conducted by a group of trained testers, all with disabilities.
